A simple popup cover graphic editor. The same functionality will exist in the product libraries to allow overriding of covers there. This functionality works with all types of documents.

Each document type+subject uses by default the cover type last used for that type+subject. That will make it easy to create a new "Historical fiction" cover which is similar to other "Book+Historical Fiction" documents.

Translation align selection allows the user to choose a book as source for alignment and also determine which side the source should appear on.

The translation alignment screen does not allow any editing except for adjusting block start and end points in order to align blocks with a source document. The blocks are displayed in boxes in the source document and with dividers in the editing document.
